

Designing better interventions
for the social inclusion and well-being
of the children of incarcerated parents

ROADMAP ON THE NEXT STEPS OF COOPERATION

1

Submit the project proposal to one or more donors;

2

Schedule regular meetings between partners to remain in contact and exchange updates;

3

Actively maintain and further develop the relationship and dialogue with the stakeholders and policy-makers that we met thanks to the project;

4

Look for new funding opportunities (Erasmus+ future calls) to jointly implement more projects on the protection of youth rights (research, inclusion of marginalized groups i.e., Roma children and families, fight against violence inside and outside school, non-formal education...), also including other partners/Countries.

Exchange detailed information regarding relevant educational projects that our two organizations are implementing to see which topics could be developed together in future projects.
